

Student Ambassador

# Danio Yang

Wuhan, China

*"The special thing I'm doing now is competing as part of our school's Physics Olympic team!"*

Howe  
Sound  
2014

Danio Yang from China wanted to complete his high school education in Canada and chose the Sea to Sky School District for a very simple reason. As he said, "BC is the warmest place in Canada, which is similar to where I come from and I like that!"

Danio is enjoying his new community of Squamish. "People here are definitely very friendly. I really like the fact that Squamish is a small town and is perfectly placed between Vancouver and Whistler. This means I can go to the big malls in Vancouver and go snowboarding in Whistler, both very easily."

Danio is on a graduation path and in his last year of school. "I love that our school is providing lots of different ways that we can spend our time, either school or after-school. For academics, we have many different courses we can choose from such as math, physics and

chemistry. We can be peer tutors in courses that we are good at and help the teachers out a bit. We can also do work experience during school hours and also get credits! All we have to do is talk to our school counselors. For after-school-time, school clubs and teams are always the good places to join."

Danio has already applied to several universities in Canada. "I'm currently doing a double block work experience, which is part of the career program, in an engineering department. The best part about it is that it is related to engineering, which is the program that I want to get into in university and this experience surely will give tons of advantages on my university study even on my future career."

Danio is very happy with his homestay. He enjoys having brothers and sisters in his homestay. "I really appreciate that I have kids in my homestay. It's so nice to

have them since kids can always make the atmosphere more comfortable and it is truly fun to play with them sometimes."

We asked Danio about leaving Squamish at the end of the year. "I would be very happy to go home and reunite with my family and friends. But at the same time, surely I will miss this place as well since it gave me so much experience and memories."
